

Street Lamp Install Step

Type(I)

Step 1

- Take out the power cord from the luminaire. The power cord has 3 wires.
- Connect the green ground wire of the luminaire to power grid ground.
- Attach the other two wires to grid power.
- Make sure the wire connections are isolated.
- Slide the wire into the pole after connection.

Step 2

- Slide the luminaire onto the lamp pole.

Step 3

- Use the two hexagon screws to attach the luminaire (8 mm hex key).

Hexagon screw
六角螺絲

Step 4

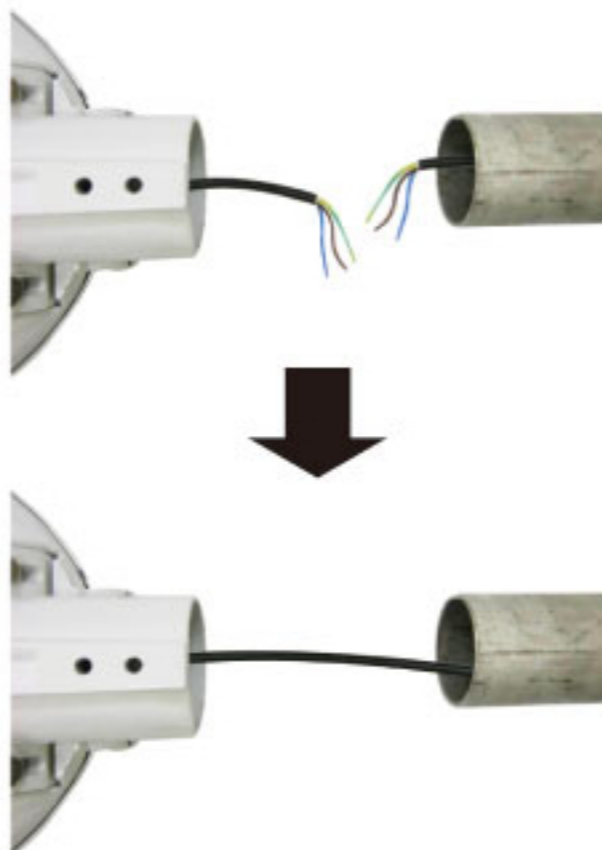

- If required, rotate the angle controller to adjust luminaire tilt to the optimal angle (10 mm hex key).
- Make sure to tighten the controller screw after adjustment.
- Verify that the installation is complete.
- Turn on power and check light distribution.
